

Research Role Profile

Job Title:	Research Fellow A
-------------------	-------------------

Responsible to:	Head of research group, or principal investigator
------------------------	---

Responsible for:	Not applicable
-------------------------	----------------

Job Summary and Purpose:
To undertake research in accordance with the specified research project(s) under the supervision of the principal investigator.

Main Responsibilities/Activities
<p>To undertake a range of research activities within a specified research area, assuming responsibility for specific areas of projects and making use of new research techniques and methods, in consultation with the research award holder or supervisor. This may include fieldwork, interviews, laboratory experimentation, critical evaluation and interpretation, computer-based data analysis and evaluation or library research.</p> <p>Using initiative and creativity to identify areas for research develop new research methods and extend the research portfolio. Analysing and interpreting results of own research. Write up results and prepare papers for submission to appropriate journals and conferences, and other outputs as required and/or appropriate. Attend appropriate conferences for the purpose of disseminating research results of personal development. The post holder may also contribute to writing bids for research grants and will contribute to collaborative decision making with colleagues in areas of research.</p> <p>Continually to update knowledge and develop skills, and translate knowledge of advances in the area into research activity.</p> <p>To plan and manage own research activity in collaboration with others. To carry out administrative tasks associated with specified research funding, for example risk assessment of research activities, organisation of project meetings and documentation. Implementation of procedures required to ensure accurate and timely formal reporting and financial control.</p> <p>To contribute to teaching in the Faculty by carrying out student supervision and/or demonstrating within the post holder's area of expertise and under the direct guidance of a member of departmental academic staff, as appropriate.</p> <p>The post holder may occasionally be required to supervise more junior research staff.</p>

Research Role Profile

Person Specification

The post holder must have:

A doctoral degree in a relevant discipline (although individuals who have almost completed a doctoral degree may be appointed). Consideration may also be given to individuals who do not hold a doctoral degree but have required skills based on a number of years experience in specified / relevant fields

The post holder will have authority over some aspects of project work and must be capable of providing academic judgement, offering original and creative thoughts and be able to interpret and analyse results.

Relationships and Contacts

Direct responsibility to the principal investigator or academic supervisor. The post holder may be asked to serve on a relevant Faculty committee. There may be additional reporting and liaison responsibilities to external funding bodies or sponsors. The post holder may work on original research tasks with colleagues in other institutions.

Special Requirements

To be available to participate in fieldwork as required by the specified research project

All staff are expected to:

- Positively support equality of opportunity and equity of treatment to colleagues and students in accordance with the University of Surrey Equal Opportunities policy.
- Help maintain a safe working environment by:
 - Attending training in Health and Safety requirements as necessary, both on appointment and as changes in duties and techniques demand
 - Following local codes of safe working practices and the University of Surrey Health and Safety Policy
- Undertake such other duties within the scope of the post as may be requested by your Manager.

Research Role Profile

Addendum to Role Profile

Job Title:	Research Fellow (1A)
-------------------	----------------------

Job Summary and Purpose:

This information sheet should be read in conjunction with the accompanying generic Research RA1A Role Profile and will be used for shortlisting processes. More specifically the post holder will be expected to:

(1) Designing and building a reactor for direct air capture of CO₂ and hydrogenation (2) Synthesis, testing and characterisation of dual function materials for integrated CO₂ capture and utilisation (3) Computationally guided optimisation of materials and operating conditions using optimisation software (4) Collaborating with and mentoring other researchers working on related projects (5) maximising impact of the research through knowledge dissemination activities

Main Responsibilities/Activities

This project will develop dual function materials (DFMs) for a circular methanol economy by integrating direct air capture (DAC) of CO₂ and utilisation through dynamic catalysis. Green hydrogen is used as co-reactant with captured CO₂ in this approach to synthesise carbon negative chemicals. This project will target methanol synthesis, as a demonstration of a circular "methanol economy". The first year of the project will focus on direct air capture/hydrogenation reactor design and materials synthesis, characterisation and testing. The project focus will then shift to computationally guided experimental optimisation.

The Research Fellow will be tasked with: (1) Designing and building a reactor for direct air capture of CO₂ and hydrogenation (2) Synthesis, testing and characterisation of dual function materials for integrated CO₂ capture and utilisation (3) Computationally guided optimisation of materials and operating conditions using optimisation software (4) Collaborating with and mentoring other researchers working on related projects (5) maximising impact of the research through knowledge dissemination activities

Person Specification

Research Role Profile

The post holder must have:

Candidates must hold (or be close to completion of) a PhD in Chemical Engineering, or another relevant discipline. Prior experimental experience with packed bed reactors and catalyst or adsorbent synthesis is essential. Candidates should apply online, fully answer the application form questions and attach a curriculum vitae (with details on education, research experiences, successes and publications to date). As part of your application, please also upload one letter of recommendation as supporting document.

Relationships and Contacts

The position is funded by the EPSRC Adventurous Energy Research for a Sustainable Net Zero scheme. The project will be led by Dr Melis Duyar.
