Research Role Profile

Person Specification

The post holder must have:

A doctoral degree in a relevant discipline (although individuals who have almost completed a doctoral degree may be appointed). Consideration may also be given to individuals who do not hold a doctoral degree but have required skills based on a number of years experience in specified / relevant fields

The post holder will have authority over some aspects of project work and must be capable of providing academic judgement, offering original and creative thoughts and be able to interpret and analyse results.

Relationships and Contacts

Direct responsibility to the principal investigator or academic supervisor. The post holder may be asked to serve on a relevant Faculty committee. There may be additional reporting and liaison responsibilities to external funding bodies or sponsors. The post holder may work on original research tasks with colleagues in other institutions.

Special Requirements

To be available to participate in fieldwork as required by the specified research project

All staff are expected to:

- Positively support equality of opportunity and equity of treatment to colleagues and students in accordance with the University of Surrey Equal Opportunities policy.
- Help maintain a safe working environment by:
 - Attending training in Health and Safety requirements as necessary, both on appointment and as changes in duties and techniques demand
 - Following local codes of safe working practices and the University of Surrey Health and Safety Policy
- Undertake such other duties within the scope of the post as may be requested by your Manager.

Research Role Profile

Addendum

We are seeking a highly motivated Research Fellow wishing to advance their career in a research-driven, interdisciplinary environment, beginning 1 November 2024 or soon after, for 24 months. The Fellow will support the Dr Lirong Liu in delivering the UKRI funded project Energy Demand Research Centre. The project offers an excellent opportunity to develop research expertise in a collaborative project by working with an interdisciplinary team involving diverse partners.

The Research Fellow will carry out research for the project in Equity theme that is finding out how different energy demand solutions can deliver an affordable, clean and more equitable net zero energy system. You will focus predominantly on develop an energy-demand focused optimisation model with the equity maximisation as the objective function and apply this model for examples of communities. You will use AI techniques to address the multi-objective and diverse challenges. Your work will also include literature reviews, data analysis, writing reports, supporting project management, as well as liaising with team members (external and internal). UK and international travel may be required.

The successful candidate will have a PhD in Power and Energy system, Environment, Sustainability or a related discipline, data analysis skills, and ideally have some expertise in AI skills.
