

Addendum

This document provides additional information relating to both specific aspects of the post/faculty and any post specific person specification criteria. The information contained within this document should always be read in conjunction with the accompanying generic Role Profile.

Job Title: Research Fellow

Background Information/Relationships

Applications are invited for a Research Fellow position to work part-time on an CCLG-funded project: Understanding paediatric ambulatory chemotherapy service provision within the UK. The successful post holder will be based in the School of Health Sciences, working with Dr Gemma Bryan, together with Dr Jess Morgan from Leeds Children's Hospital.

The aim of this project is to understand the current status of ambulatory chemotherapy provision within paediatric oncology services across the UK. Taking into account both how services have been implemented and the current experience of receiving or delivering care, this project will consider a range of issues related to AC, which will develop iteratively as data is collected and analysed.

The successful candidate will be a member of our Early Career Researcher group, have mentorship from a senior colleague, be provided opportunities for professional development and be part of our vibrant and energetic School. The post is a fixed-term post (23 months).

Person Specification

This section describes the sum total of knowledge, experience & competence required by the post holder that is necessary for standard acceptable performance in carrying out this role. This is in addition to the criteria contained within the accompanying generic Role Profile.

	Essential/ Desirable
