

Research Role Profile

Job Title:	Research Assistant
-------------------	--------------------

Responsible to:	Head of research group, or principal investigator
------------------------	---

Responsible for:	There is no direct supervisory responsibility
-------------------------	---

Job Summary and Purpose:
To support research activity in accordance with specified research project(s) under the supervision of the principal investigator

Main Responsibilities/Activities
<p>To support a research team by contributing to the planning of research projects and undertaking prescribed research tasks in accordance with specified research project(s), making use of standard research techniques and methods. These may include fieldwork, interviews, laboratory experimentation, computer-based data analysis or library research as directed by the research award holder and will entail co-ordinating own work with that of others to avoid conflict or duplication of effort. Analysing and interpreting results of own research, under the guidance of research award holder or supervisor. Write up results and contribute to the preparation of papers for submission to appropriate journals and conferences, and other outputs as required and/or appropriate. Attend appropriate conferences for the purpose of disseminating research results of personal development.</p> <p>Continually update knowledge and develop skills</p> <p>To carry out routine administrative tasks associated with a specified research project, for example risk assessment of research tasks, organisation of project meetings and documentation. This will entail planning own day-to-day research activity within the framework of the agreed programme, dealing with problems that may affect the achievement of research objectives and deadlines and implementing procedures required to ensure accurate and timely formal reporting and financial control</p> <p>Demonstrating, or occasionally assisting with undergraduate supervision within the post holder's area of expertise and under the direct guidance of a member of the Faculty academic staff.</p>

Research Role Profile

Person Specification

The post holder must have:

A first degree or a professional qualification or equivalent in a relevant subject.

At least part-completed a relevant doctoral degree or have relevant experience in a given field.

Whilst there is no requirement for previous work experience, the post holder will be expected to be able to support research activities by performing experiments and/or undertaking studies and analysing/ interpreting results.

Relationships and Contacts

Direct responsibility to the principal investigator or academic supervisor.

Special Requirements

To be available to participate in fieldwork as required by the specified research project.

All staff are expected to:

- Positively support equality of opportunity and equity of treatment to colleagues and students in accordance with the University of Surrey Equal Opportunities policy.
- Help maintain a safe working environment by:
 - Attending training in Health and Safety requirements as necessary, both on appointment and as changes in duties and techniques demand
 - Following local codes of safe working practices and the University of Surrey Health and Safety Policy
- Undertake such other duties within the scope of the post as may be requested by your Manager.

Research Role Profile

Addendum

This document provides additional information relating to both specific aspects of the post/faculty and any post specific person specification criteria. The information contained within this document should always be read in conjunction with the accompanying generic Job Purpose

Job Title: Research Assistant in Analytical Chemistry

Background Information/ Relationships

This role will support the development and delivery of a screening capability to identify counterfeit tablet medicines. Important to protect the public the harm of illegal tablets as well as the reputation of the global pharmaceutical industry. This project will require working alongside the manufacturer of the instruments (Waters) and a specialist software developer (SpectralWorks) in addition to other staff in the School of Chemistry and Chemical Engineering. The project will aim to refine the analytical process for tablet analysis and collect data to validate the process with appropriate documentation. Quarterly reports will be delivered to project sponsors.

Person Specification

This section describes the sum total of knowledge, experience & competence required by the post holder that is necessary for standard acceptable performance in carrying out this role. This is in addition to the criteria contained within the accompanying generic Job Purpose

Good written and verbal communication skills	E
Good organisational and time management skills	E
An ability to work autonomously, under appropriate supervision	E
Experience in ambient ionisation mass spectrometry	E
Ability to work safely in a chemistry laboratory	E
Knowledge of mass spectrometry data analysis software	D
Understanding of chemometric data processing techniques	D

Key Responsibilities

This document is not designed to be a list of all tasks undertaken but an outline record of any faculty/post specific responsibilities. This should be read in conjunction with those contained within the accompanying generic Job Purpose.

- Prepare risk assessment and COSHH documentation for tablet formulations
- Conduct experiments to screen tablet formulations for counterfeits
- Develop protocol for screening experiments
- Systematically analyse and record all experimental data
